MySQL

Jonathan Zhan

What is SQL?

SQL stands for Structured Query Language

Used to store, manipulate, and retrive data from relational databases

Very popular

Why SQL

SQL is optimized for databases

Open-source and easy to use

Very in-demand skill

SQL Commands

DDL - Data Definition Language

DML - Data Manipulation Language

DCL - data Control Language

DQL - Data Query Language

DDL

Create, creating a table

Alter, altering an existing table

Drop, deletes an entire table

Truncate, deletes a part of a table

DML

Insert, creates a record in the table, so essentially a row

Update, modifies records

Delete, Deletes records

DCL

Grant, grants privilege to a user

Revoke, takes back privilege from user

Data Query Language

Select, retrieving certain records from tables
